EDUCATION

COMSATS UNIVERSITY ISLAMABAD

September 2022 – June 2023

BS Cybersecurity

SOFT SKILLS

- Documentation
- Cross-Team communication
- Research
- Problem Solving

CORE COMPETENCIES

Languages:

Python, Java, JS
(React, NodeJS), C++ ,
CSS, HTML

Backend & APIs:

Flask/FastAPI, REST
APIs, Docker

Databases:

PostgreSQL,
MongoDB, MySQL,
SQLite

Operating Systems:

Kali Linux, Windows,
Ubuntu WSL

PROFESSIONAL PROFILE

Cybersecurity and full-stack development student with hands-on experience in penetration testing, vulnerability scanning, and building custom security tools. Skilled in Python, Java, Node.js, and backend API development. Strong interest in OSINT, data pipelines, and vendor risk scoring aligned with startup environments.

PROFESSIONAL EXPERIENCE

INARA TECHNOLOGIES

JUL 2025 – SEP 2025

Cybersecurity Intern

I gained hands-on experience with advanced network security tools (Nmap, Nessus, Ettercap/Bettercap), explored web security in depth (BurpSuite, PortSwigger Labs, DVWA, OWASP Top 10, CTFs), and worked on multiple red-team style projects across domains (6–8 total).

PROJECTS

- [KAIROS V1.0](#)
Python(Scapy), JSON, Logging module
Deception-based honeypot to log and analyze attacker activity.
- [HADESPATH](#)
Python (Scapy), CLI Design, Cross-Platform Networking
Firewall bypass PoC leveraging covert ICMP channels.
- [VX RECON](#)
FastAPI, React (Vite + Tailwind), Postgres, Docker, Alembic
Python vulnerability scanner for exploiting misconfigured web apps.
- [VORTEX LOGGER HARDENED WITH SONARQUBE](#)
Sonarqube, Dev Productivity & Tooling, Security & Code Quality
Used SonarQube to identify and fix security vulnerabilities in Vortex Logger, a Python project, strengthening its code quality and security.
- [4R3S NEON DOMINION](#)
Python 3.11 + Flask, caddy, Docker, Cloudflare Tunneling, CSS+Jinja
Tarpit snare website to lure and analyze attacker environments.
- [MTINT OSINT TOOL](#)
Java, JavaFX, OSINT, App Development
Java OSINT automation tool to gather Personal Details about the target
