Professional Profile

Developer with a focus on building real-world applications and solving practical problems through code. Experience across cybersecurity, full-stack development, and automation, with a strong interest in product development, performance, and user-driven improvements.

Education

COMSATS University Islamabad
BS Cybersecurity, CGPA: 3.06

Islamabad, PK
Expected 2027

Westminster Academy
A-Levels, 1A*, 1A

Islamabad, PK
2023

Experience

Inara Technologies
Cybersecurity Intern

Islamabad, PK
Jul 2025 – Sep 2025

- Scanned and assessed network security in lab environments using Nmap, Nessus, and Ettercap/Bettercap.
- Identified and exploited vulnerabilities across OWASP Top 10 categories — including SQL injection, XSS, and access control flaws — using Burp Suite, PortSwigger Labs, and DVWA.
- Built GitHub Actions CI/CD pipelines to automate security linting and vulnerability scanning for red-team style projects.

Projects

- **ThreatLens | Next.js, JavaScript**

Built and deployed ThreatLens using Next.js and Vercel, focusing on application structure, performance, and user experience. Designed core features end-to-end and implemented reusable components to support scalable threat analysis workflows.

- **KAIROS | Python, Network Security Tool**

Built a modular network security tool with detector, responder, logger, configuration, and utility modules for packet detection, response modes, logging, and CLI-based interaction. Designed modular architecture with focus on usability and extensibility for real-world network testing scenarios.

- **Ares Vortex | Cybersecurity YouTube Channel**

Developing a hybrid quantum-classical neural network (PyTorch CNN + PennyLane) for zero-day malware detection while documenting the live research and architecture on the Ares Vortex YouTube channel.

Technical Toolkit

Also worked with TypeScript, Java, C++, React, Node.js, FastAPI, Docker, PostgreSQL, MongoDB, and AWS basics through coursework and personal projects; TryHackMe (Top 25%) for applied security practice.

Certifications

ISC2 CC (In progress), Introduction to CIP (OPSWAT)
